

MEMORANDUM

To: Board of Directors, Executive Committee, Joint Operations Committee and DCC Staff
 From: Executive Director Tom Folie
 Date: July 10th, 2017
 Subject: Dakota Communications Center Monthly Statistics - June, 2017

The DCC reviews monthly activity and performance based on measurements approved by the Board of Directors. Activities measured are call pickup, call processing and emergency medical dispatch (EMD).

- There were 28,208 calls received and 29,215 CAD events.
- The 7 and 10 second call pickup times were just short of the standard with 77% picked up within 7 seconds and 87% within 10 seconds.
 The standard of 95% of incoming emergency calls picked up within 20 seconds was exceeded at 97%.
- NFPA standard for dispatching of structure fires was met this month. 90% of Structure Fire calls were processed within 64 seconds and 95% were processed within 106 seconds. "All Other Fire Calls" were processed with 85% within 64 seconds and 95% within 106 seconds.
- Law call processing times with the exception of weapons, met standard with an average creation time of less than 55 seconds.
- EMD Case Entry and Total Compliance percentages met standards.

Below is an overview of DCC performance for the month of June.

	Comparisons	
	2016	2017
Fire/EMS CAD Events	2,041	2,130
Law Enforcement CAD Events	28,328	27,085
911 Calls	16,305	15,824
	YTD	YTD
	2016	2017
Fire/EMS CAD Events	11,102	12,067
Law Enforcement CAD Events	149,536	147,531
911 Calls	83,158	81,465

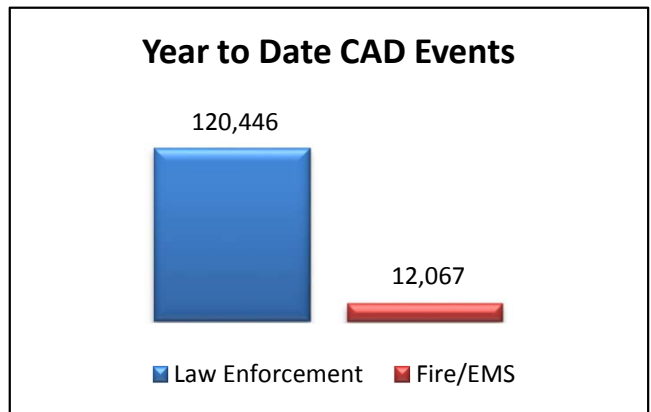

Incoming Calls

	Total Calls	Wireline	Wireless
9-1-1	15,824	2,582	13,242
10-Digit Admin	<u>12,384</u>		
TOTAL	28,208		

CAD Events*

	Law Enforcement	Fire/EMS	Total
June	27,085	2,070	29,155
Year to Date	120,446	12,067	132,513
Year to Date % of Calls	91%	9%	

* Individual agency CAD events are listed at the end of this report.

9-1-1 Call Pick-Up Performance

This performance standard is based on the nationally recognized National Emergency Number Association (NENA) standard of 90% of incoming calls answered within 10 seconds and 95% of incoming calls answered within 20 seconds.

DCC Standard: 80% of incoming calls answered within 7 seconds
90% of incoming calls answered within 10 seconds
95% of incoming calls answered within 20 seconds

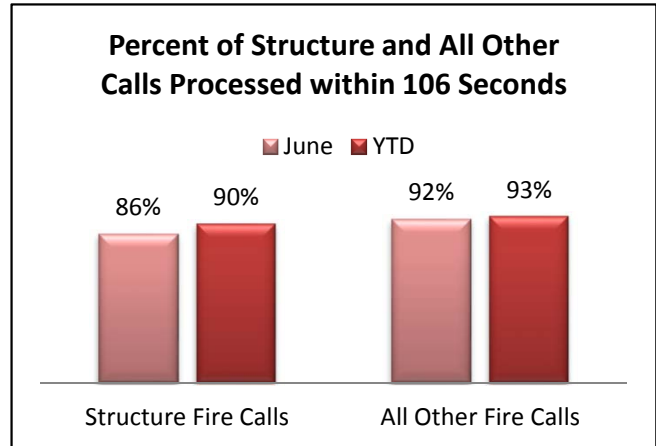

Fire Call Processing Times

Fire call processing times are measured from the time the telephone rings through completion of the initial dispatch, often referred to as "ring to ding". DCC standards are taken from the NFPA standard 1221.

NFPA Standard for Structure and All Other:

90% of calls processed within 64 seconds

95% of calls processed within 106 seconds

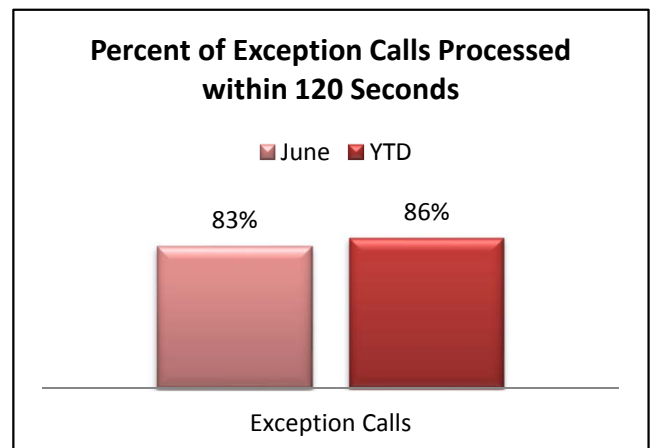

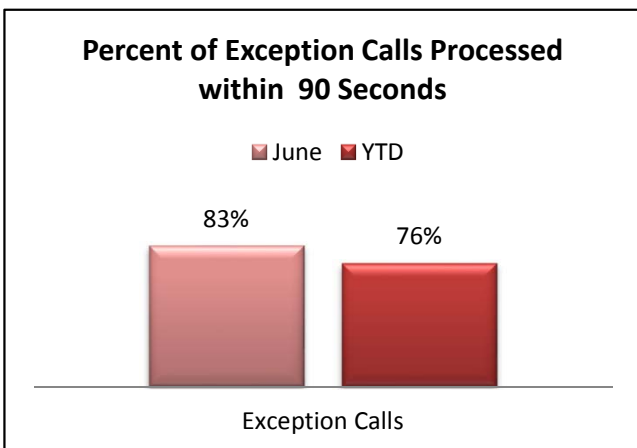

Average processing time for non-exception structure fires was 55 seconds. Average call received to pending was 45 seconds. Average from received in pending to dispatched was 10 seconds.

Average processing time for all other non-exception calls, including FMED and PI Accidents, was 45 seconds.

NFPA Standard for PI Accidents with Confirmed Entrapment and Exception Calls:

90% of calls processed within 90 seconds

99% of calls processed within 120 seconds

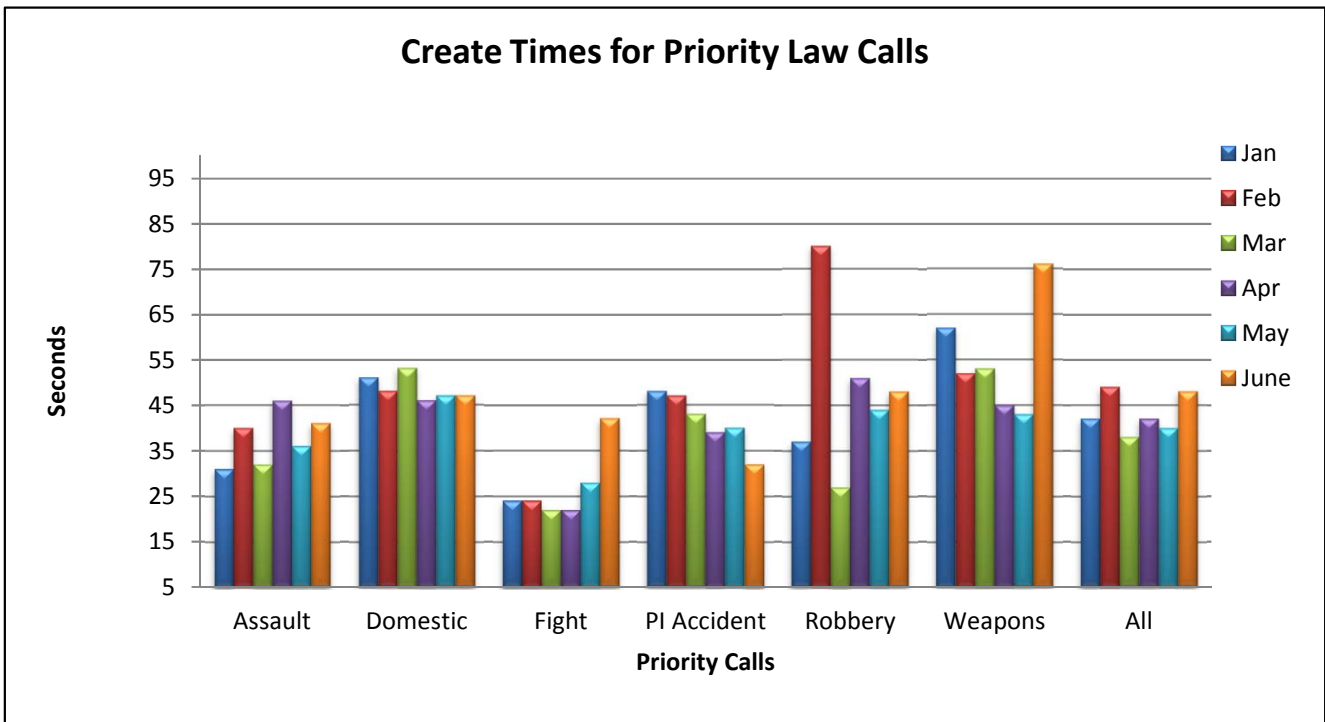

Exception Calls include HAZMAT, Water or Ice Rescue, EMD #22, when there is the need for TTY, use of Language Line or where there are difficulties determining a location. (Any call included in the exception category due to location difficulty has been reviewed.)

Law Enforcement Call Processing Times

As there is not currently a designated national standard, the Law Enforcement Operations Committee has designated a standard that identifies certain priority one call types that should be created within 55 seconds on average. The dispatching of priority one calls varies based on individual agency protocol so it is not considered in the standard.

DCC Standard: Average total creation time of 55 seconds or less for the following incident types

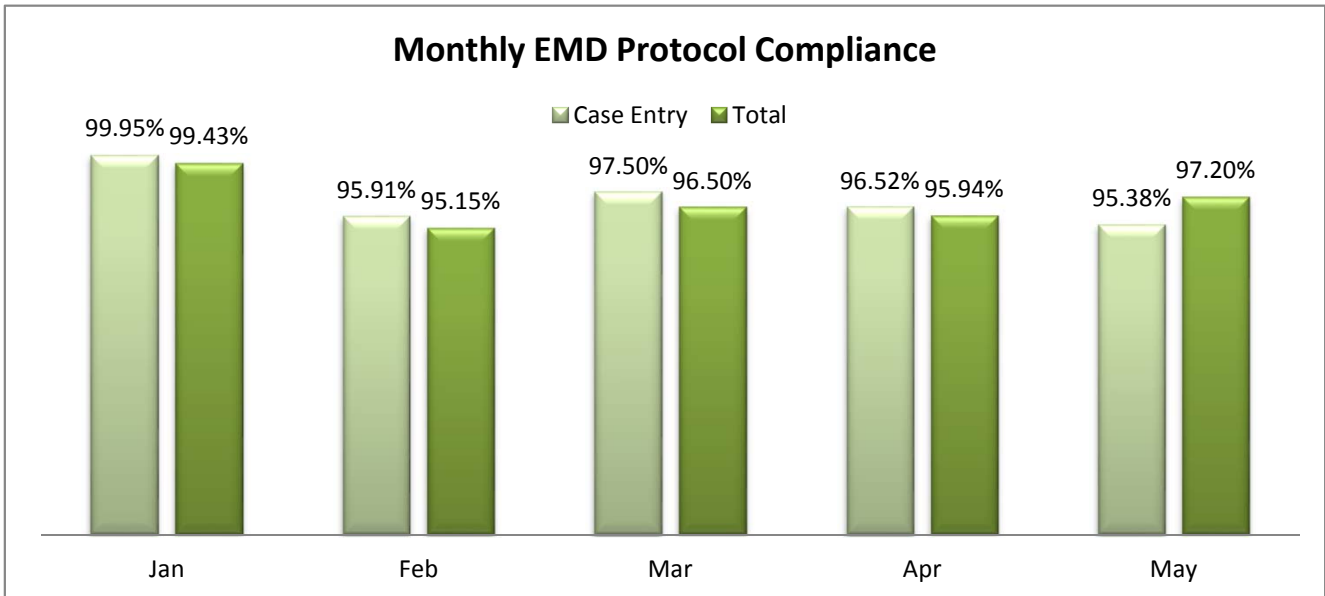

- | | | |
|-----------|---------------------------|-----------|
| Assaults | Fights | Robberies |
| Domestics | Personal Injury Accidents | Weapons |

Emergency Medical Dispatching

Emergency Medical Dispatching is a call processing protocol used to determine the severity of medical emergencies. The EMD protocol determines level of response by local providers while enabling the dispatcher to offer pre-arrival instructions to the victim. The performance standard is based upon Priority Dispatch Quality Assurance (Pro-QA) guidelines.

DCC Standard: 95% Case Entry Compliance
90% Total Compliance
