

MEMORANDUM

To: Board of Directors, Executive Committee, Joint Operations Committee and DCC Staff
 From: Executive Director Tom Folie
 Date: 6/7/2018
 Subject: Dakota Communications Center Monthly Statistics - May 2018

The DCC reviews monthly activity and performance based on measurements approved by the Board of Directors. Activities measured are call pickup, call processing and emergency medical dispatch (EMD).

- There were 27,880 calls received and 31,338 CAD events.
- Call pickup times were met with 84% answered within 7 seconds, 94% within 10 seconds and 100% of calls answered within 20 seconds.
- NFPA Standard for fire call processing: 90% of Structure Fire calls were processed within 64 seconds. and 100% were processed within 106 seconds. "All Other Fire Calls" were processed with 88% within 64 seconds and 91% within 106 seconds.
- Priority Law call processing times with the exception of weapons, met standard with an average creation time of less than 55 seconds. Processing times for weapons was 68 seconds.
- EMD Compliance was based on a smaller sampling of calls for May. Case entry was 73.5%. Total compliance was 94.7%.

Below is an overview of DCC performance.

	Comparisons	
	2017	2018
Fire/EMS CAD Events	2,070	2,381
Law Enforcement CAD Events	25,871	28,957
911 Calls	14,781	15,699
	YTD	YTD
	2017	2018
Fire/EMS CAD Events	9,937	10,989
Law Enforcement CAD Events	120,446	128,122
911 Calls	65,641	67,483

	Total Calls	Wireline	Wireless
9-1-1	15,699	2,364	13,305
10-Digit Admin	12,181		
TOTAL	27,880		

CAD Events*

	Law Enforcement	Fire/EMS	Total
Month	28,957	2,381	31,338
Year to Date	128,122	10,989	139,111
Year to Date % of Calls	92%	8%	

* Individual agency CAD events are listed at the end of this report.

9-1-1 Call Pick-Up Performance

This performance standard is based on the nationally recognized National Emergency Number Association (NENA) standard of 90% of incoming calls answered within 10 seconds and 95% of incoming calls answered within 20 seconds.

DCC Standard: 80% of incoming calls answered within 7 seconds
 90% of incoming calls answered within 10 seconds
 95% of incoming calls answered within 20 seconds

Fire Call Processing Times

Fire call processing times are measured from the time the telephone rings through completion of the initial dispatch, often referred to as "ring to ding". DCC standards are taken from the NFPA standard 1221.

NFPA Standard for Structure and All Other:

90% of calls processed within 64 seconds

95% of calls processed within 106 seconds

Average processing time for non-exception structure fires was 42 seconds. Average call received to pending for all other fire was 40 seconds. Average from received in pending to dispatched was 10 seconds. Average processing time from received to dispatched was 50 seconds.

NFPA Standard for PI Accidents with Confirmed Entrapment and Exception Calls:

90% of calls processed within 90 seconds

99% of calls processed within 120 seconds

Exception Calls include HAZMAT, Water or Ice Rescue, EMD #22, when there is the need for TTY, use of Language Line or where there are difficulties determining a location. (Any call included in the exception category due to location difficulty has been reviewed.)

Law Enforcement Call Processing Times

As there is not currently a designated national standard, the Law Enforcement Operations Committee has designated a standard that identifies certain priority one call types that should be created within 55 seconds on average. The dispatching of priority one calls varies based on individual agency protocol so it is not considered in the standard.

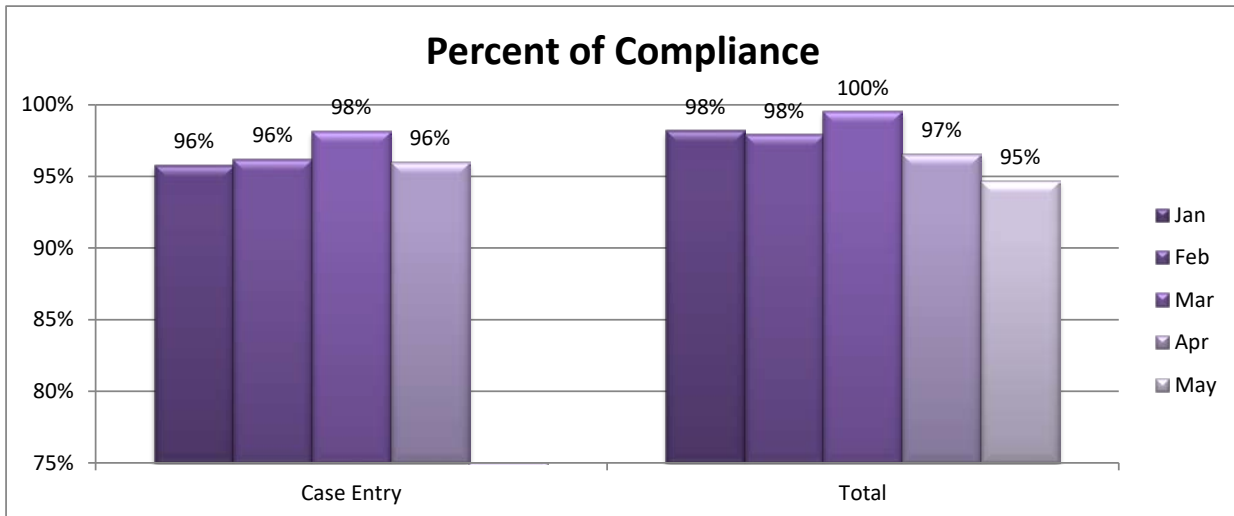

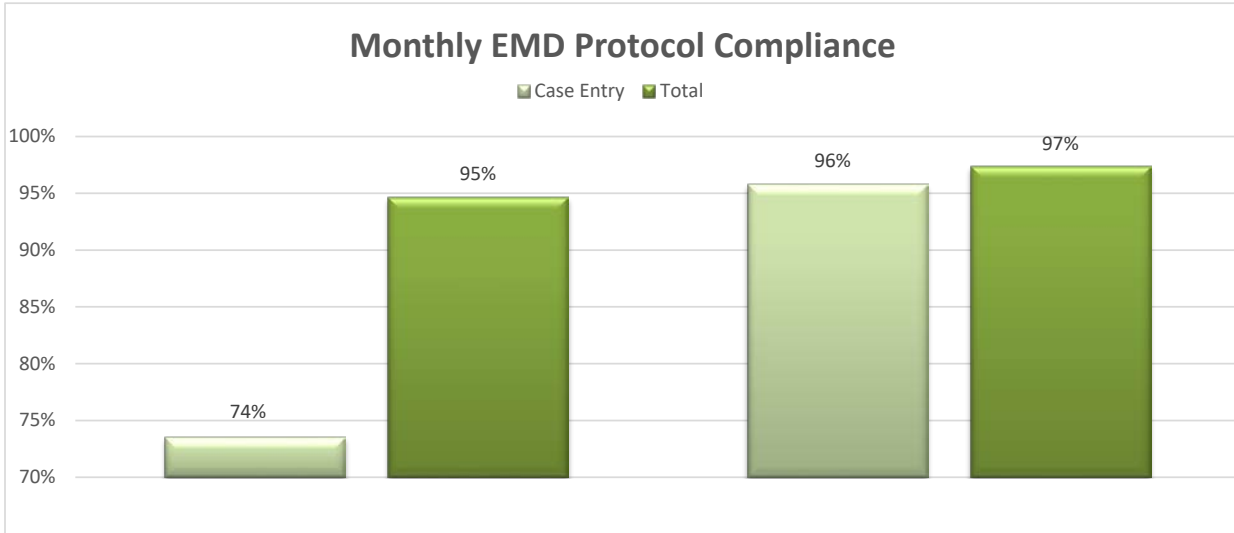

DCC Standard: Average total creation time of 55 seconds or less for the following incident types
 Assaults Fights Robberies
 Domestic Personal Injury Accidents Weapons

Emergency Medical Dispatching

Emergency Medical Dispatching is a call processing protocol used to determine the severity of medical emergencies. The EMD protocol determines level of response by local providers while enabling the dispatcher to offer pre-arrival instructions to the victim. The performance standard is based upon Priority Dispatch Quality Assurance (Pro-QA) guidelines.

DCC Standard: 95% Case Entry Compliance
 90% Total Compliance
